

# SUSPENSION

## Rollator

**drive**

**DeVilbiss**  
HEALTHCARE

Developed with comfort in mind, this rollator combines modern design with a sophisticated, shock-absorbing suspension system and practical features.

The Drive DeVilbiss Suspension Rollator helps to ease aches and pains caused by uneven or rough terrains by reducing vibrations transmitted through the rollator frame when in use. This lessens usage impact to provide a much smoother journey.

The Suspension Rollator is side folding for compact storage and transportation. A handy seat allows users to rest when needed and a soft flexible backrest provides additional comfort and support whilst seated. It also features large, arthritic friendly, loop lock brakes, a removable zipped storage bag to carry essentials and a cane holder.

## Key Features
