Aluminium-alloy manual wheelchairs

# Performance, style and comfort

The Ergo 115 is a lightweight aircraft grade aluminium wheelchair which breaks down to 8kg (18lbs). The lightweight frame is braced by a system of double cross braces which increase the wheelchair's strength and durability. The streamline oval tubes not only make the wheelchair look great but also add strength to the wheelchair structure.

The Ergo 115 is packed full of innovative features that you would expect from a Karma wheelchair including; slowing brakes, quick release wheels, detachable upholstery and the patented Ergo seating.

▲ Self propel

Pressure redistribution

Reduced sliding

▲ Transit

**HOW DOES IT WORK?**

**TRADITIONAL SEAT**

High risk of decubitus ulcers could be occurred because pressure points are concentrated on hipbone area.

**S-Ergo SEAT**

The S Ergo system promotes pressure relief by spreading weight over a greater area. This also increases stabilization and reduces sliding.

Extended seat depth to support taller users.

Performance, style and comfort.

## FEATURES

### Ergonomic armpad

The wide armpad is design to give extra support for the elbow.

### Swing-away footrest

Swing in/out footrest hangers for added convenience. They offer increased support for legs and thighs.

### Extended armrest

Extended armrests maximise the seat area and minimise the overall width of the wheelchair.

### Tube-in-centre footplate

New footplate design gives more support to legs, so users can easily relax thigh muscles.

### Ergonomic handrim

The new handrim design helps the user propel the wheelchair. Both transit and self propel models have quick release wheels.

### Aegis microbe shield seat and back

Comfortable mesh back and seat with detachable seat covers. Both are treated with Aegis microbe shield.

### Anti tips

Anti tips, provide greater sitting safety.

### Oval tubes

The oval tubes make the wheelchair look great and add the strength of the wheelchair structure.
