

# LANDRANGER S HD

Why limit yourself to the tarmac, when the parks, grasslands and countryside are calling? Our super-strength Landranger models are built for the great outdoors.

## LUXURY IN THE COUNTRY

Like a luxurious SUV, the Landranger S HD gives you strength with refinement and power with comfort. Ready for all sorts of terrain, it cushions you from the rougher edges.

## SMOOTH EVEN ON THE ROUGH

With a shock absorption system as well as suspension, you can ride comfortably, and always stay in control, through every dip in the landscape.

## COMPACT AND LIGHTWEIGHT

The smaller and lighter of our two Landranger models, the Landranger S HD is designed for adventure with a short 55" frame.
