Roma Medical Aids Ltd, York Road, Bridgend Industrial Estate, Bridgend, CF31 3TB

## Roma Porter Chair Range

Developed in conjunction with Moving and Handling advisors in the NHS, the RMA Health range of patient transfer chairs provide a future proof solution for the safe transfer of patients in the acute medical environment.

RMA Health set out to design a range of Patient Transfer chairs that incorporated the 3 key performance criteria of Safety, Functionality and Reliability.

Innovation is at the heart of RMA Health's design ethic. 'Auto-Brake technology' as featured on the Blenheim & Burghley models, help to prevent falls risk by ensuring that the chair is always in a braked position until the push handle is depressed.

The sliding foot rest is easy to engage and retract due to its sealed design. On the Burghley Bariatric chair – the split footplate allows the carer to place the patient's legs in situ individually which reduces associated manual handling risks.

Along with the 3 year frame warranty (subject to conditions) RMA Health can provide a pre-planned maintenance package to further enhance the life cycle of your patient transfer chair fleet. (POA).

With your RMA Health Patient Transfer Chair, you can be assured that you have equipped your facility with a British Made, Safe, Reliable and Functional product.
