

Patient
Turner
Aid

Patient Turner Aid

The Patient Turner Aid helps a carer or attendant to transfer a user to a seat, bed, wheelchair, toilet or commode by standing and turning. It contains a sturdy steel frame, providing stable support for the user. The height can be adjusted on the handles to suit the users requirements, while padded lower leg supports are also tool-free adjustable in width, angle and height.

2 rear 8cm (3") castors
ensures effortless transporting
between patients

Tool free angle and height
adjustable padded lower leg
supports

Low profile base facilitates
user feet placement

Face to face use ensures constant interaction between the carer and individual

Patient Turner Aid

Features:

- » Designed to help a weight bearing individual with good upper body strength transfer from one surface to another by standing and turning
- » Sturdy steel frame provides stable support for user
- » Height adjustable handles to suit user requirements
- » Padded lower leg supports can be adjusted (tool free) in width, angle and height to suit user comfort
- » Low profile base facilitates user feet placement
- » Substantial base area provides stability, with rear bar also allowing carer to counterbalance
- » Handle has multiple gripping points for varying carer/user support requirements and is angled to enable "nose-over-toe" standing movement
- » Opening on central handle bar allows quick fitting of optional support belts
- » 2 rear 8cm (3") castors ensures effortless transporting between patients - **not to be used for transporting the user**
- » Easily dismantled/reassembled without tools for transportation and storage
- » Easy wipe-clean surfaces
- » Requires user to pull on handle to stand up and to be weight bearing
