ALUMINUM THRESHOLD BRIDGING RAMPS

These aluminium bridging threshold ramps are lightweight and portable, and will help anyone in a wheelchair or scooter easily negotiate a doorway that is not level. They are available in three different lengths and heights to suit most applications.

The ramps are manufactured from durable checker plated aluminium that ensures good grip and is rust resistant for longevity of service. The ramps have anti-slip pads on the underside for added stability and allows surfaces to be protected whilst the ramps are in use. They are simple to install with no tools to assemble or fixings needed. Maximum Load Capacity is 272kg.
